The **breakcites** package

Don Hosek, Leo Broska

02/20/1997

The breakcites package ensures that multiple citations may break at line end. It makes a very minor change to the operation of the `\cite` command. Note that the change is not necessary in unmodified LaTeX; however, some package restore the undesirable behaviour of the command in LaTeX 2.09.

List of changes:

- Don Hosek   3/14/89   (LaTeX209-Version)
- Leo Broska   02/20/97 (LaTeX 2_ε-Version)
